

Jing-Ze Ma (马竞泽) | Curriculum Vitae

Astrophysicist | jingze@mpa-garching.mpg.de | jingzema.com

RESEARCH INTERESTS

Theoretical & computational astrophysics: Radiation magnetohydrodynamics, Massive stars, Binary stars, Supernovae and other transients, Gravitational wave progenitors, Exoplanetary atmospheres

EDUCATION

PhD candidate in Astrophysics Sep. 2022 – 2026 (expected)

Max Planck Institute for Astrophysics | Ludwig-Maximilians-Universität München Garching | Munich, Germany

• Advisor: Prof. Selma de Mink. Close collaborators: Ruediger Pakmor, Stephen Justham, Andrea Chiavassa

• Topic: *The 3D Nature of Evolved Massive Stars*

Bachelor of Engineering in Engineering Mechanics Aug. 2018 – June 2022

Tsinghua University Beijing, China

• Thesis: *Diverse stellar models with random transverse magnetic fields* (Outstanding bachelor's thesis in Tsinghua)

RESEARCH EXPERIENCE

Carnegie-Caltech/Burke Postdoctoral Fellow Sep. 2026 –

Carnegie Observatories/Caltech Pasadena, USA

PhD researcher Sep. 2022 – July 2026

Max Planck Institute for Astrophysics Garching, Germany

Undergraduate internship Oct. 2021 – Apr. 2022

Max Planck Institute for Astrophysics (remote due to COVID) Advisor: Dr. Rob Farmer Garching, Germany

Undergraduate summer internship June 2021 – Oct. 2021

University of Nevada, Las Vegas (remote due to COVID) Advisor: Prof. Bing Zhang Nevada, USA

SELECTED HONORS AND AWARDS

Carnegie-Caltech/Burke Fellowship 2026

IAS member at the Institute for Advanced Study in Princeton (declined) 2026

Kippenhahn Prize (Once per year for the best paper by a MPA student) 2024

Max Planck Institute for Astrophysics Garching, Germany

Outstanding bachelor's thesis 2022

Tsinghua University Beijing, China

PUBLICATIONS

** indicates papers of my students. See also [ADS](#) or [Google scholar](#)

In preparation:

1. **Jing-Ze Ma**, Selma E. de Mink, Stephen Justham, Andrea Chiavassa, Rüdiger Pakmor, and Taeho Ryu. “Entropy rain drives envelope convection in massive supergiant stars”. *to be submitted*, 2026.
2. **Giovanni Stimamiglio, **Jing-Ze Ma**, Ylva Götberg, and Selma E. de Mink. “Theoretical predictions on the surface magnetic fields of binary-stripped massive stars”. *in preparation*, 2025.

Published & submitted:

3. **Jing-Ze Ma**, Rob Farmer, Selma E. de Mink, and Eva Laplace. “Carbon from massive binary-stripped stars: Effect of metallicity”. *Astronomy and Astrophysics*, 704:A179, 2025.
4. **Jing-Ze Ma**, Stephen Justham, Ruediger Pakmor, Andrea Chiavassa, Taeho Ryu, and Selma E. de Mink. “AREPO-RSG: Aspherical Circumstellar Material and Winds from Pulsating Dusty Red Supergiants in Global 3D Radiation Hydrodynamic Simulations”. *submitted to ApJ*, 2025.
5. **Jing-Ze Ma**, Rüdiger Pakmor, Stephen Justham, and Selma E. de Mink. “AREPO-IDORT: Implicit Discrete Ordinates Radiation Transport for Radiation Magnetohydrodynamics on an Unstructured Moving Mesh”. *submitted to A&A*, 2025.
6. **Jing-Ze Ma**, Andrea Chiavassa, Selma E. de Mink, Ruggero Valli, Stephen Justham, and Bernd Freytag. “Is Betelgeuse Really Rotating? Synthetic ALMA Observations of Large-scale Convection in 3D Simulations of Red Supergiants”. *The Astrophysical Journal Letters*, 962:L36, 2024.
7. Yu-Qing Lou and **Jing-Ze Ma**. “Supermassive stars with random transverse magnetic fields”. *Monthly Notices of the Royal Astronomical Society*, 516:1481, 2022.

8. **Jing-Ze Ma** and Bing Zhang. “Reverse shock forming condition for magnetized relativistic outflows: reconciling theories and simulations”. *Monthly Notices of the Royal Astronomical Society*, 514:3725, 2022.
9. **Jing-Ze Ma** and Bing Zhang. “Relativistic oblique shocks with ordered or random magnetic fields: tangential field governs”. *Monthly Notices of the Royal Astronomical Society*, 511:925, 2022.

12. Chen Wang, Lee Patrick, Abel Schootemeijer, Selma E. de Mink, Norbert Langer, Nikolay Britavskiy, Xiao-Tian Xu, Julia Bodensteiner, Eva Laplace, Ruggero Valli, Alejandro Vigna-Gómez, Jakub Klencki, Stephen Justham, Cole Johnston, and **Jing-Ze Ma**. “Using Detailed Single-star and Binary-evolution Models to Probe the Large Observed Luminosity Spread of Red Supergiants in Young Open Star Clusters”. *The Astrophysical Journal Letters*, 981:L16, 2025.
13. Ruggero Valli, Christopher Tiede, Alejandro Vigna-Gómez, Jorge Cuadra, Magdalena Siwek, **Jing-Ze Ma**, Daniel J. D’Orazio, Jonathan Zrake, and Selma E. de Mink. “Long-term evolution of binary orbits induced by circumbinary disks”. *Astronomy and Astrophysics*, 688:A128, 2024.
14. Rob Farmer, Eva Laplace, **Jing-Ze Ma**, Selma E. de Mink, and Stephen Justham. “Nucleosynthesis of Binary-stripped Stars”. *The Astrophysical Journal*, 948:111, 2023.
15. Taeho Ryu, Rosalba Perna, Ruediger Pakmor, **Jing-Ze Ma**, Rob Farmer, and Selma E. de Mink. “Close encounters of tight binary stars with stellar-mass black holes”. *Monthly Notices of the Royal Astronomical Society*, 519:5787, 2023.

TALKS AND CONFERENCES

- **Invited review:**

Paris Observatory, France, **Workshop: Horizons for Optical Long Baseline Interferometry**, 2025/01
Massive Binary Science in the 2040s **SLIDES**

- **Invited:**

UC Berkeley, California, USA, **Astronomy department lunch talk**, 2025/11
Carnegie Observatories, Pasadena, USA, **Anthony Piro’s group meeting**, 2025/11
Caltech, Pasadena, USA, **Astronomy Tea Talk**, 2025/11
University of Colorado Boulder, USA, **Astro & Planetary Sciences Lunch Seminar**, 2025/11 **VIDEO**
Princeton University, USA, **Eliot Quataert’s group meeting**, 2025/11
Institute for Advanced Study, Princeton, USA, **Astro Coffee**, 2025/11
Flatiron Institute (CCA), New York, USA, **Stars & Plasma Astrophysics group meeting**, 2025/11
MPIA (MPI for Astronomy, Heidelberg), Germany, **Galaxy Coffee**, 2025/07
MPIA (MPI for Astronomy, Heidelberg), Germany, **Mario Flock’s group meeting**, 2025/07
ESO (European Southern Observatory), Germany, Stellar Coffee and Planetary Tea, 2024/11
HITS (Heidelberg Institute for Theoretical Studies), Germany, **Fritz Röpke’s group meeting**, 2024/11
Université Côte d’Azur, Nice, France, **PEPPER collaboration meeting**, 2024/10
Argelander Institute for Astronomy, Bonn, Germany, **Norbert Langer’s group meeting**, 2024/04
MPI for Gravitational Physics (AEI), Potsdam, Germany, **CRA seminar**, 2024/03
Université Côte d’Azur, Nice, France, **Stellar & solar physics seminar**, Lagrange Laboratory, 2023/03
Tsinghua University, Beijing, China, **Planet-Disk-Star seminar**, 2022/05

- **Contributed:**

Tsinghua University, Beijing, China, **Planet-Disk-Star seminar**, 2024/09
Dali, China, **Conference: The Progenitors of Supernovae and their Explosions**, 2024/08
Lorentz Center, Leiden, Netherlands, **Workshop: Stripped stars**, 2024/07
KITP, Santa Barbara, USA, **Workshop: Tidal disruption events**, 2024/05 **VIDEO**
Carnegie Observatories, Pasadena, USA, **Andrew Benson’s group meeting**, 2024/05
Caltech, Pasadena, USA, **Astronomy Tea Talk**, 2024/05

Flatiron Institute (CCA), New York, USA, [Gravitational Wave group meeting / Stars & Plasma Astrophysics group meeting](#), 2024/04
Harvard University, Boston, USA, [Lars Hernquist's group meeting](#), 2024/04

MIAPbP, Garching, Germany, [Workshop: Gaia, spectroscopy & asteroseismology](#), 2023/08
Krakow, Poland, [European Astronomical Society \(EAS\) Annual Meeting](#), 2023/07
MPA, Garching, Germany, [VLT-FLAMES Tarantula Survey Collaboration Meeting](#), 2023/03
MIAPbP, Garching, Germany, [Workshop: Impact of Binaries on Stellar Evolution](#), 2022/11
Zoom, [SuperVirtual](#), 2022/11 [VIDEO \(39:00-56:00\)](#)

PROFESSIONAL ACTIVITIES

Referee: The Astrophysical Journal (ApJ; 2023-)

Organizers: MPA stellar seminar (2024-2025); Half-day 20-people workshop on stellar B field

PROGRAMMING SKILLS

Astrophysical codes:

Developer:

[AREPO](#) (3D moving-mesh radiation MHD): Developer of the state-of-the-art radiation module.

[Seven-League Hydro](#) (3D implicit MHD): Experimental extension for exoplanetary atmosphere.

[COMA](#) (3D radiative transfer): My Python code to produce mock ALMA spectra from 3D simulations.

Advanced user (personal modifications to the codes):

[AthenaK](#) (3D radiation MHD on GPUs): Experimental extension for exoplanetary/stellar atmospheres.

[MESA](#) (1D stellar evolution): Modified for simplified B field evolution and impacts on stellar structure.

[MAGRETTE](#) (3D radiative transfer): Incorporated continuum opacity.

User (basic level): [CO5BOLD](#) (3D radiation MHD; Analyzing output), [FASTCHEM](#) (chemistry)

Languages: Kokkos (GPU), C/C++, Fortran, Python, Bash, Matlab

Visualization: PyVista, Plotly, yt, Paraview, Matplotlib, TULIPS

SUCCESSFUL PROPOSALS

2025-2026, Scientific PI, NHR@FAU (tier 2), **10 million CPU hours** on [Fritz supercomputer](#)

The AREPO-RSG project: Global 3D radiation MHD simulations of red supergiant envelopes

2024-2025, Scientific PI, NHR@FAU (tier 2), **10 million CPU hours** on [Fritz supercomputer](#)

A grid of global 3D moving-mesh radiation hydrodynamic simulations of red supergiant envelopes

MENTORING

Master student: 2024/03-present, Giovanni Stimamiglio, LMU (University of Munich), continued as PhD at MPA

Primary advisor, weekly meeting, co-advised with formal advisor de Mink (Stimamiglio, Ma, et al. in prep.)

PhD student: 2025/07-present, Silvia Anastasia Popa, MPA – Help with MESA setup

MEDIA COVERAGE AND OUTREACH

Media coverage:

2024/03, ApJL paper featured in [Scientific American](#), [Nature Astronomy](#), [AAS Nova](#), [INAF \(Italian\)](#)

Public talks:

2025/07, Two invited talks at X-Institute summer school for first-year bachelor students, Shenzhen, China

Light-years away: How to make weather forecasts for stars and giant exoplanets

2024/04, [One-hour podcast in Mandarin \(Romantic research\)](#) with X-Institute mentors, Shenzhen, China

2024/01&07, Three invited talks at winter/summer school for high school students, Shenzhen, China

How to see through the disguise of a star

2022/01, Invited talk at X-Institute winter school for college students across all disciplines, Shenzhen, China

An engineering student's pathway to astronomy
